Notable Traits	Traits 74 Head Cloudy eye (old scarring)		
Assessor Comments	Angus feeder heifers that were bred in Tassie and sent to Bookaar on agistment. The east coast of Tassie has experienced very dry conditions for the last couple of years and these heifers would have been given two opportunities to join. Heifers have freshened up nicely and ready to be fed. The majority of draft offer frame that can be filled if the nutrition/animal health is adequate. Cloudy eyes are not considered an inhibitor to performance. Cattle were in holding paddock over night prior to yarding.
