Cattle definitely had some run in them, but exacerbated by very poor yards to process cattle. Typical temperament of cattle that have been on agistment, paddock moved periodically but otherwise little human contact.

Notable Traits

Traits

21 Head

Cloudy eye (old scarring)

Assessor Comments	Angus feeder steers that were bred in Tassie and sent to Bookaar on agistment. The east coast of Tassie has experienced very dry conditions for a prolonged period. Steers have freshened up nicely and ready to be fed. Cloudy eyes are not considered an inhibitor to performance but be aware every animal has one eye cloudy. Cattle were in holding paddock over night prior to yarding.
