Other Treatment 24/03/2026 Multimin

Vendor Comments	Team Te mania progeny herd since 2009 with majority of foundation cows sourced directly from the Te Mania stud herd. All cows are ACR recorded and data is collected throughout the life of all progeny (BWTs,200/400DWTs, carcass scanning at 14 months).		
Temperament	Yards	Crush	Paddock
	Quiet: 121 head	Quiet: 119 head Slightly Stirry: 2 head	Temperament not assessed in Paddock
	Very quiet weaners to handle, their temperament is a real feature of these steers. All walked through the yards easily and only the very odd steer slightly agitated in the crush. They were very easy to handle as a mob after weighing and would suit the most discerning cattle person.		
Handled With	Bikes , On foot , Vehicles		
Notable Traits	Traits		
	5 Head Ring worm (not detrimental) 1 Head White on pizzle (see photo)		
Assessor Comments	These steers are part of the Team Te Mania Progeny Test group - a progressive group of Angus producers where performance data is collected throughout the life of all progeny and all females are recorded on the ACR. This lot represents the middle draft (B-Double line), all individually weighed 260-316kg to average 292kg with an overnight curfew at assessment - please note there is a total of 251 steers are being offered in this sale. 72% of the drop are by leading A.I sires (see sire IDs in extended breed description). These steers have come through the weaning process well, being feedlot/ bunker trained for 6 weeks and have been on pasture more recently. The average IMF EBV in the herd is +4.2, which is nearly double the seedstock average, which is testament to the breeding objectives targeting high-end, long fed Angus programs. Their quiet temperament is a real feature, all very quiet/ docile to handle. These are first class steers, some of the best in the country, they will not dissappoint.
