Age

17 - 20 Months

Age Breakup: October 2024 - January 2025 drop steers. The heavier steers in this age group have been sold into the EU heavy feeder market in the past two months. All inducted as milk teeth. It is likely these steers will be the younger steers in this age group.

Assessment: Individual on 08/06/2026 Sampled: 127 Head (100%)

Comment on Fat Score 1 Cattle

Steers are in mostly store to forward store condition, all are strong and fit to load. No issues with transport are anticipated if normal trucking procedures are followed.

Vendor Bred

Yes

Lifetime Traceable

100% of cattle in this lot are Lifetime Traceable

Breeding Comments

Steers are from a cow herd made up of Angus, Shorthorn & Santa Composite cows. Sired by Angus, The Grove Shorthorn and Gylanda Santa bulls, selected on carcass attributes & growth EBVs.

Grazing Conditions

Grazing dried off pasture with some fresh pick coming through from recent rain.

Returned to: Returned to paddock with access to cotton seed.

|                                       | Steers were good to handle throughout the yards and crush. When back in the yard together most were settled and remained quiet when being photographed. A handful of steers in total did not settle and would run to escape pressure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                      |                                           |                             |            |

| Assessor Comments                     | A line of vendor bred, good to very good quality EU steers. Steers were yard weaned in June 2025, moved onto Oats post weaning last winter and have been grazing native pastures up until now. These steers are normally taken through to heavy EU feeder weights or crop finished for the EU Grassland slaughter market. Vendor is only selling due to the season. LWR at assessment was 281kg - 388kg after a 2 hr walk to the yards. Please note weight gain, this reflects the fact that the steers have been chasing the green pick for the last 7 - 10 days. This is anticipated to continue so steers will be fed cotton seed in the paddock up until delivery. With medium to large frames they suit to take onto export feeder weights or finish for a range of EU, grassfed slaughter markets. Please note that there is one steer who had a slight blue eye spot in both eyes, one with a moderate blue eye and three steers with slight blue eye scaring in one eye. Note, one steer visible in the video with a short tail will not be loaded, to make this lot 127hd. These flatback steers are from a cow herd made up of Angus, Shorthorn & Santa Composite cows. Sired by Angus, The Grove Shorthorn and Gylanda Santa bulls, selected on carcase attributes & growth EBVs. Steers are being listed as two 'run out the gate' lots, each lot making up one road train (total of 8 decks listed). Property is located on the Carnarvon Hwy, 12km South of Surat. |                                      |                                           |                             |            |
