Assessor Comments	Vendor bred Angus weaned steers, that were bred on lighter Rocky River country (40km east of Tenterfield) and trucked to Vendor's Tenterfield property for weaning and assessment. Steers weighed from 105kg to 185kg to average 151kg after a huge curew. Cattle are generally worked with horses and dogs and were good to handle during assessment. Please note steers will loose weight during weaning - make your own assessment. Brother lot in same sale.
