The steers that were slightly stirry in the crush were only unsettled on the scales & walked away once released. Low stress stock handling techniques are used by vendor. Steers were observed walking in laneway to yards & were good to handled.

Assessor Comments: Buyers a line of Angus steers in store condition that will go ahead on good feed with plenty of compensatory weight gain. These steers are quiet & well handled and will suit trade or feeder weights. They are in strong store condition & are only being sold due to dry conditions in the area.
