	Some of the steers in the mob were agitated and quick at times. Overall considering an older set of yards they still flowed well but care was needed when in pressure areas.

Assessor Comments	Offering 156 Angus cross and cross bred feeder steers. These steers averaged 461kg live at assessment after a large day in the yards of handling. The steers were HGP treated back in November and have done very well since. The majority of the steers show good frame with stretch and are in great condition after a good season at Fernhurst. Don't miss the opportunity to purchase a large 6 deck line of feeder steers weighed up and ready to perform in the feedlot.
