Cattle were generally good to handle throughout the yards and crush. Eight head became slightly agitated in the crush and two heifers were highly agitated. Most settled when back in the yards together. They did tend to move quickly as a mob when moving past but would slow as soon as they were away from any pressure.

Assessor Comments	A line of good to mostly very good quality line of medium to large frame heifers. They are a mix of vendor bred heifers and heifers purchased as weaners and are 100% lifetime traceable. They are a mix of breeds ranging from soft crossbreds through to approx 10% showing BI content from 39 - 50%. Heifers are unjoined and were scanned at assessment - all are NDP. All heifers were moithed as assessment and are all milk teeth - most are strong milk teeth with approx 10% showing wear on milk teeth. They have a LWR of 327 kg - 410 kg full weight and they suit to take directly onto feed or crop and finish for a range of grass-fed slaughter markets. Please note two other lots of similar heifers approx 20km away listed in this sale.
