| Assessor Comments                     | A line of weaned Angus heifers. Heifers are presented in store- forward store condition, due to dry seasonal conditions. Given an opportunity these Angus heifers should suit a backgrounding job to trade as a feeder later down the track. Heifers have been fed minimal hay, cottonseed and corn on the ground alongside the cows prior to weaning. NOTE: 1 heifer had slight scurrs at assessment, (not visible without catching and feeling). 2 heifers had mild blue eye scarring. Heifers appeared to have potential itch mite. |                                           |                                        |
