	14 Head	Ring worm			
Assessor Comments	An outstanding line of Angus steers weighing 320–399kg at assessment. These are genuine grass-fed, antibiotic-free, 2025-drop steers by Knowla T129 and Dunoon R757, out of quality Tollua Cattle Co cows. The steers have been grazing irrigated oats and rye, with access to lucern hay and a dry lick, and have been averaging 1.9kg/day since their previous weigh, based on Gallagher scale records. The vendor places a strong emphasis on genetics, temperament and performance, with these steers presenting in forward store condition and offering excellent weight gain potential. The cattle are quiet, well handled and were yard weaned in February 2026. They come from a program with a proven history of strong feedlot performance.
