| Assessor Comments                     | Top quality weaned Angus steers from one of the better herds in this district. This is the draft of the younger Steers, they have the frame and conformation to perform on grain or grass. The Steers have had all the animal health treatments including the first Bovillis vaccination. They present in fresh condition and have had no set backs. This herd has undergone a heavy culling regime in the last few years and that shows through .The range in weights is age not quality related. 3 have some white on them , the odd one has a bit of ringworm and can be seen in the video. Two have a small pink eye scar in one eye but no issues there. NOTE steers should fit on one deck, if the carrier has any issues we will take some of the lighter weight steers out. |      |                |      |   |                                     |
