	Heifers were easy enough to handle in the yards. There are individual animals that are alert and have some run, but not combative. Cattle handled typical of animals that have little human contact when on agistment.		
Handled With	Bikes , Dogs , On foot , Vehicles		
Notable Traits	Traits 38 Head Cloudy eye (old scarring)		
Assessor Comments	Angus feeder heifers that were bred in Tassie and sent to Bookaar on agistment. The east coast of Tassie has experienced very dry conditions for the last couple of years and these heifers would have been given two opportunities to join. Heifers have really performed well in the last 60 days (1kg gain p/day in that period) but seriously wet conditions have meant an early exit is a necessity.. Cloudy eyes are not considered an inhibitor to performance. Every heifer mouthed as four tooth 60 days ago and heaviest animals mouthed again at assessment to confirm status.
