Extreamely well educated steers that have been through an extensive weaning program. mostly handled with horses and dogs. These steers were very easy to move through the yards and were drafted easily.

Handled With	Bikes , Dogs , Horses , On foot , Vehicles
Assessor Comments	These steers present an opportunity to purchase 4 decks of quality steers that are weaned and very well handled with horses bikes and dogs. The vendor has made a big effort to have these steers so well educated. The calf sap has been weaned out of these steers and their going ahead well gaining .6kg/day since weaning. The vendor has pre-treated these steers for tick clearing through an Amitik plunge dip however does not guarantee them clean. They presented as being free of tick at the time of assesment. While most of these steers present as quality types there are 6 plain steers in the mob.
