The NBGen program is built on multi-trait excellence of calving ease, fast growth, carcass quality and maternal form and function. Their females are run commercially in sub par environments while under selection pressure of tight joining periods and confidence in these heifers on offer is very strong, a tough decision to sell them. These heifers went through a 10-day weaning program handled daily through yards and walked out with dogs until settled. Ideal future breeders to grow out and join to the bull of your choice. The group average in the top 20% for the Angus Breeding Index bringing an extra $241 more profit and are sired by leading Angus Sires - Hart Network, G A R Apex, Woodhill Comstock, NBGenetics Underhill U828 and NBGenetics Uili U881.
