These heifers were a pleasure to assess and truly show the benefits of being properly yard weaned and educated. They were no fuss throughout and would complement any herd.

Assessor Comments	A very nice line of commercial Angus heifers being offered direct a/c Karoo Angus, Meadow Flat (Bathurst). August / September drop weaners although being the younger calves from the 25' drop i would suggest they are principally September drop. Yard weaned back in early march prior to the CTLX weaner sales these heifers have progressed nicely and now present in ideal condition to punch on through to the spring. From one of the most highly regarded herds in the industry they present an excellent opportunity to put away to join in the spring or to grow into a feeder heifer if that is your target market. A very odd heifer just showing some slight ringworm marks although of no consequence just to note. First rate heifer weaners come with my highest recommendation.
