Assessor Comments: Offering a b-double load of Angus steers weighing 248-390kg at assessment. These steers are acclimatised with all treatments up to date and are stacking the weight on. They are grazing cereal crops that have plenty of quality food on offer due to the soft start to winter. They have been bunk trained in containment at purchasing and are pleasant to work. They were purchased in to graze winter crops and are being sold to make room for lighter weaners in preparation to lock crops up. This line represents the tops of the purchased steers. They have had 2 x 5 in 1 and 2 x MH+IBR as well as a recent drench and are recording an average daily weight gain around 1.5kg with fat cover starting to increase. Ideal to background for the strong feeder or kill markets with all of the preparation and expense behind them. Quality Angus steers that are settled in their group and will remain as one until delivery.
