Assessor Comments	This uniform line of 28 Angus yearling heifers offers excellent versatility, presenting at ideal early feedlot entry weights while possessing the maternal traits required for future breeders. Weighing an average of 387.7 kg at assessment (with a tight range from 339 kg to 444 kg), they sit right in the sweet spot for intensive short-grain feeding or immediate backgrounding programs. Simultaneously, their deep-bodied Angus frame, polled status, and quality genetics tracing back to Barossa Black and Gommer's bulls make them highly attractive replacement heifers to retain for a breeding herd.
