These steers moved very well through the yards, into the pound and in the crush. Four of them became agitated in the crush and calmed down instantly once back in the mob. They walked calmly out into their paddock after the assessment.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , On foot , Vehicles

Notable Traits

	Traits
6 Head	Old fly bite
4 Head	Old White Eye

Assessor Comments	Offering 4 decks of 104 Feeder Steers. These steers are 88% vendor bred by Carabar or Ardrossan Angus bulls, along with Valera Vale Droughtmaster bulls, the remaining 12% were purchased from Southern NSW and Victoria. Please note that only the older-type steers were mouthed (60 head), with 78% milk teeth, as a mob the milk teeth percentage would likely be higher. A very good run of steers with plenty of room to move, carrying enough softness to suit southern feedlot programs. They were excellent to handle, weigh and mouth, and walked away from the yards respectfully after the assessment. The steers are HGP Free and have had no antibiotics. There were only 6 head under 380kg and 7 head over 520kg, with the balance presenting as a very neat and even line of feeder steers.
