Comment on Fat Score 1 Cattle	Cattle were weaned onto hay in yards for two days then trucked & went straight onto bunk feeders. The few lesser conditioned cattle are still very strong.		
Vendor Bred	Yes		
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable		
Breeding Comments	The genetics of the herd is built up mostly using Landfall Angus bulls for many years with some Clunie Range Bulls used in the past also.		
Grazing Conditions	Weaners have been bunk fed on a high fibre maintenance ration since the 15th April Returned same		
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment		
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives		
Health Treatments	Vaccinated	15/04/2026	7 in One Second Dose
Vendor Comments	In normal years the cattle are weaned then grown out to supply the supermarket feeder cattle trade, but as the property was extremely dry they were weaned early onto a high fibre maintenance ration to keep them moving forward.

	These weaners haven't had a lot of training as they only spent a couple of days at the home yards when weaned before being transported to where they were put straight onto feedlot bunks. Some have a little bit of run in them but are easily blocked. Only a couple got a bit excited in the crush.			
Handled With	Bikes , Horses			
Assessor Comments	Your prayers have been answered & this excellent opportunity has presented itself for you to purchase these cracking weaner heifers as the very dry conditions has forced an early sale on these young angus sired females. The majority oozing softness & showing good depth & width of body. These are quality cattle and will suit either backgrounders or could also be used as future or replacement breeders. They have been weaned into bunk feeding pens on a high fibre maintenance ration so they will know how to adapt quickly to feedlot conditions if grown out for weights to suit the trade feeder market. Its a win win whichever path you take. * Please note there is a few in the mob with slight blemish in one eye; but not detrimental * Please also note there is signs of worm in the mob and would recommend a drench when they get to their new home..
