	Steers work well through yards although need steadying through gateways as with all western cattle handled in big mobs good stock handling technique needs to be used as cattle will move freely away from pressure . Some became agitated in crush or confined spaces but settled once returned to mob.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , On foot		
Assessor Comments	Buyers a line of USDA NOP organic ,Gap certified feeder steers .Steers purchased from Hale River Cattle Co in June 2025 as light weight str's and they have performed well since a break in the season in January. This is the older line drafted out of run of Crossmoor steers and are Ideally suited to take through to the lucrative Organic slaughter market ,alternatively they were drafted into 100 day weight specs for the conventional feeder market. Please note some show signs of fly rub on neck and two have old blight scarring in one eye. Vendor has 3 lots brothers this sale.
