Totals			100%	100%

Comment on Fat Score 1 Cattle

All are score 1's and considered fit to travel any distances provided they are not loaded too tight.

Vendor Bred

Stock History

Lifetime Traceable

Breeding Comments

Yes

Bred out of a good quality herd of Red Angus females.

100% of cattle in this lot are Lifetime Traceable

All by registered Red Angus bulls purchased ex: Anama (SA). The genetic gain from the introduction of these sires has been very beneficial to this herd.

Grazing Conditions

Bred in traprock country and currently has had a very dry summer/autumn. There was 50mm received 2 weeks ago so there is a very light coverage of clover coming through. Still in the weaning process and being fed good quality hay in the yards.

Returned to: Will be held in holding paddocks on mainly dry grass and supplemented with hay.

Burr/Seed in Coat

Noogoora burr on the head, in the coat and tail brush on most steers.

HGP Status

Health Treatments

Chemical Residue

The owner declares that the cattle have not been treated with HGP at any period of their lives

Clear - No known history

Vendor Comments	The annual turnoff of weaners. These were just discarded from the main lines to tidy them up.		
Any Access To Bulls or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to bulls or stags.		
Temperament	Yards	Crush	Paddock
	Quiet: 19 head	Quiet: 19 head	Temperament not assessed in Paddock
	These have quietened down very well since weaning commenced with all the bellowing for the cows almost gone. They all handled very easily at assessment through the crush and in the race and probably the quietest crop of weaners I have assessed at Warroo. They had never been through the race prior to assessment, they behaved like they had been up there numerous times. Very quiet out in the bigger yards for photos and video. They do respond well to bikes and dogs in the paddock.		
Handled With	Bikes , Dogs		
Assessor Comments	Buyers, a small lot of Red Angus lightweight mixed sexes that were just discarded from the two main lines of steers and heifers. The vendor thinks these are probably just younger than the others hence the lighter weights of them. They will probably just need a bit of TLC once purchased as some of them are still fairly light in weight to be discarded from the cows. Please check the video to get an accurate assessment of their condition. They are very clean in the muzzle with no nasal discharge that is sometimes prevalent in weaners at this time of year indicating good health. The 13 steers weighed from 96-145kgs to average 123kgs. The 6 heifers weighed from 75-123kgs to average 99kgs.		
Assessor	Bob Jakins (Level 1 Accredited) Phone: 0419 788 366		
Delivery Period	23/06/2026 to 23/06/2026 (1 day)
