	Cows are typical of cattle running in larger pastoral conditions, they are well handled, work well through the yards and are quiet to handle in the paddock and on waters. Typically some cows did stir up in the yard when placed under pressure or away from there mates and were protectant of there weaners coming off. The cows know there way through the yards, scales, draft etc, overall well handled cows that know the drill.							
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , Vehicles							
Assessor Comments	A fair mob of cast for age station mated weaner mothers. Cows are nearly all vendor bred one brand breeders. Large and Medium framed chance mated cows that are continually joined to Grey Brahman and Charolais Bulls, they are in store and forward store condition and will suit a grass or crop fattener as a trading opportunity with the possibility of being back in calf. Bred on light desert country they will perform very well.
