Assessor Comments	An outstanding line of Angus cows PTIC to Angus bulls. Cows show in forward condition with good frame and plenty of body. Suitable as a quality breeding line with plenty of weight and condition. Cows were preg tested at assessment 6 to 8 months in calf with a fair portion being joined to Bongongo Angus bulls. Please note that all cows were bought out of a store sale as cows and calves preg tested back in calf, so information on the dates that the bulls were put in and taken out is only an estimate given on how far in calf they were when they were scanned. These cows are in a lot of 51 head being sold as a run out the gate with another 26 cows in the same sale.
