Handled With	Bikes , Dogs , On foot , Vehicles			
Assessor Comments	This is an outstanding opportunity for commercial producers to buy Ex-Stud PTIC T & U drop cows from Coota Park Blue-E herd. Only for sale due to being superseded by the next generation. They are due commence calving late-August for approximately 8 weeks. The Coota Park Herd has 30 years of performance recording for feed conversion efficiency - the longest recorded herd in the world. These cows will take advantage of hybrid vigour, being highly fertile, high growth & feed efficient cattle to boost the bottom line of any commercial cattle person. All single sire joined to Top feed efficiency Blue-E yearling Bulls that will be the pick of the catalogue in the upcoming Coota Park 2026 Bull sale in September. Extra emphasis is given to mature cow size in these genetics and management system; hence they aren't overly big cows but extremely efficient beef producers. Please take note of the graphs in the media highlighting the focus on rapid early growth whilst reducing mature cow weight EPDs. A real highlight of these females is their docility making them ideal for someone of any level of experience. Please note: the vendor has another line of 17 cows in this sale to make a neat 2 decks of 39 PTIC cows.
