	These heifers were good in the paddock when mustered and worked through the yards well. The heifers were a little unsettled once processed and pregnancy tested but did settle after a while. The heifers didn't show any aggressiveness but took a while to settle when someone different was around.			
Handled With	Bikes , Dogs , Horses , On foot , Vehicles			
Assessor Comments	A quality mob of PTIC Ultra Black X Brangus heifers in calf to a Brangus bull (Picture in assessment). These heifers are all well grown for there age and structurally correct. They are already showing plenty of udder development and out of a well bred herd of cows culled heavily for fertility and structure.
