	Heifers worked well through a very good and very well designed set of yards for assessing, and weighing. In the yard heifers were free moving and alert, this may have been due to them having been recently pregnancy tested and worked through the yards prior to assessment.				
Handled With	Bikes , Dogs , Horses				
Notable Traits	Traits 3 Head Fly rub marks on neck and/or dulpap				
Assessor Comments	Vet tested PTIC 4-7 months good and very good quality Droughtmaster first calf future breeders straight out of vendors replacement herd. Forced sale due to ongoing dry season, these well grown heifers are in calf to quality Sevenangle Droughtmaster bulls. Out of a good commercial cow herd, these heifers have been selected for fertility, temperament, growth and type over many years. These young heifers show good growth for age and are predominately large framed making them ideal replacement breeders. The progeny of these breeders show high performance from backgrounding, through to slaughter as either grass or grain fed as well as high demand when being sold as weaners.
