Cows have had thumping weaners taken off them that averaged 330kg on the 16th June (only 2 weeks ago) and are 4-7 months back in calf. Vendor is consistently buying bulls in the top price bracket as well as AI ing to leading sires and genetics. Vendor selects heavily on frame, growth temperament and fertility, with all cows raising a calf and getting back in calf every year. Only for sale as vendor is needing to lighten off their numbers to make way for stud heifers purchased recently to bring in some different bloodlines. .
