	Yard situation wasn't ideal with recent rain falls hence some cows being assessed as slightly stirry. Some cows did not handle mouthing process all that well but should be given benefit of the doubt. Once back in paddock cows behaved as station bred cows, a couple of cows tending to want to drift off a little quickly although mustering team soon brought them back for photos and video.

Assessor Comments	35 x PTIC Angus Cows. Bongongo and Brookfield Park Bloodlines. Commence calving mid-August for 10 weeks. Pregnancy test was completed in April and all cows were in calf at that stage. Previous heifer progeny of cows have gone onto making terrific breeders with the steer portion filling background, feedlot and bullock orders. Good trading opportunity.
