Assessor Comments	A nice line of black cows that are safely preg tested in Calf to Pharo Angus bulls . Lighter weights are represented by the younger cows in this lot. The majority of these cows have weaned calves in the last few weeks. Give the right opportunity the younger cows should continue to mature into nice females as they continue to produce calves. A large portion of these females would be retained other than the seasonal conditions at present. Give the right opportunity the younger cows in this mob should mature into nice size females. The season has forced the vendors hand selling off breeders that would have been usually retained.
