	very quiet cattle to work in the yards and are very used to hand feeding and regular paddock movements. I stood in the herd in the paddock for the video and they were very comfortable to be within several meters of me without issue. An exceptionally quiet herd.				
Handled With	Vehicles				
Assessor Comments	A genuine dispersal of a Speckle Park herd. The cows are in excellent condition with very fresh calves at foot. The cows are very quiet in the paddock yards and crush. A wonderful opportunity to secure cattle in production and three in one units. One calf is dry and would appear miss mothered. Six calves have signs of pink eye with clouding of the eye in one eye only. They are also being fed hay that may be the issue.
