Cattle were very quiet to handle at assessment with all walking up the race with little to no pressure applied. Vendors practice low stress stock handling with all their stock and it is true reflection in these heifers.

Handled With	Aerial (Helicopters, gyro's and planes) , Dogs , On foot , Vehicles
Assessor Comments	Buyers a quality line of 30 Droughtmaster & Charolais X PTIC Heifers that have all their breeding life ahead of them. Heifers present in store to forward condition and are best described as large frame overall. Heifers have been preg tested in calf to Charolais & Droughtmaster bulls 4 - 6 months by a vet. Vendor is only offering these for sale to tighten up their calving window as have enough breeders around them. A great line of quiet big frame heifers that would be great replacement breeders or fatten & split article once calved out.
