Vendor Bred

Yes

Lifetime Traceable

100% of cattle in this lot are Lifetime Traceable

Grazing Conditions

Improved pastures and supplementary hay

Returned same

Burr/Seed in Coat

No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status

The owner declares that the cattle have not been treated with HGP at any period of their lives

Vendor Comments

A genuine line of quiet, vendor-bred cows that are easy to work with and have consistently raised quality vealers. The vendor would normally retain these females, however they are being offered due to a change in farming direction.

Joining Details

Station Mated - Continuously Joined

Bull Breed(s): Angus

Preg Tested?

Yes, this lot was pregnancy tested, by Andrew Maudsley (Vet) on 11/06/2026.

Pregnancy Terms	33 Head (100%) PTIC, from 5.5 to 7.5 months (at time of assessment 09/06/2026). Certificate Available.		
Other Joining Details	No Pregnancy Terms apply.		
Temperament	Joined to Leawood bulls		
	Yards	Crush	Paddock
	Quiet: 30 head	Quiet: 28 head	Quiet: 33 head
	Slightly Stirry: 3 head	Slightly Stirry: 5 head	
	Cattle were walked through the yards for assessment and mouthed. A few cattle objected to the mouthing process; however, once returned to the paddock they settled immediately, showing no signs of stress and stopping to eat hay while photos were being taken.		
Handled With	Bikes , Dogs , On foot , Vehicles		
Assessor Comments	**33 PTIC F1 Angus Cows** The vendor presents a quality line of 33 PTIC F1 Angus cows that represent his complete F1 maternal herd. These proven vealer mothers range from second to fourth calvers and have consistently produced quality Angus-sired progeny. All cattle are vendor bred, with the cows bred from the vendor's own large-frame dairy herd, creating productive, high-capacity F1 females with strong maternal traits. The cows are PTIC to quality Leawood Angus bulls and are due to calve from 1 August to 30 September, offering buyers a compact spring calving program backed by proven Angus genetics. All cows were mouthed at assessment, with 19 head identified as 4–6 tooth and 14 head as 7–8 tooth. Cattle were handled through the yards for assessment and, while a small number objected to the mouthing process, they settled immediately upon return to the paddock and showed no signs of stress. An excellent opportunity to secure a genuine line of productive, vendor-bred F1 females carrying their next Angus calf. The vendor would normally retain these females; however, they are offered as a complete dispersal of the F1 maternal herd due to a change in enterprise direction.
