| Assessor Comments      | Due to a change in their operational direction, Millbrook Farms are offering a tremendous opportunity for a potential buyer to purchase classed in breeding females under genuine dispersal conditions. Screaming fertility & longevity, these mature females are due for their fourth CAF in a matter of weeks. In the prime of their life with an eye catching phenotype that illustrates how well these animals are truly bred and proves this is an opportunity not to be missed. With the export cull female market hitting record pricing once again it is a fantastic time to secure well bred PTIC animals at potentially minimal change over. These rising five year old Cows present in an ideal calving condition, spending the previous four weeks roaming around the hilly country of Millbrook to prepare them for their upcoming calving period. There has been no expense spared when purchasing sires from the well renown Yavenvale Hereford Stud & it is evident in the exceptional maternal attributes these females possess. This particular consignment represents the retained 2021 born females with a small tail removed at assessment. |            |                         |                             |

| Fit To Load            | Please note that current Fit To Load standards place restrictions on the transportation of FEMALES IN LATE PREGNANCY. Cattle in the last 4 weeks of pregnancy are advised not to be transported unless under Veterinary approval. Responsibility for adherence lies with Agent, Vendor, Transporter and Purchaser.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |            |                         |                             |
