Assessor Comments	Due to a change in their operational direction, Millbrook Farms are offering a tremendous opportunity for a potential buyer to purchase classed in breeding females under genuine dispersal conditions. After successfully raring their first calf to a high standard & completing a positive pregnancy test these young females will be a welcomed addition to any existing Hereford breeder or perhaps even a perfect start up package. In recent times a management decision was made to significantly increase the entire Spring calving model which illustrates the fact you are purchasing genuine classed in animals that were destined to be retained for in herd use. These rising three year old Cows present in an ideal calving condition, spending the previous four weeks roaming around the hilly country of Millbrook to prepare them for their upcoming second calving. There has been no expense spared when purchasing sires from the well renown Yavenvale Hereford Stud & it is evident in the exceptional phenotype these females possess. This particular consignment represents the retained 2023 born females with a small tail removed at assessment.
