Assessor Comments	Selling a complete herd dispersal of quality 6-year-old Angus cows with February/March-born Angus calves at foot. Offered as 7 cows with their 7 calves, these units present an excellent potential 3-in-1 opportunity, with the cows rejoined on 26/04/2026. The calves are marked and vaccinated, and every cow and calf can be positively identified to each other. No expense has been spared on genetics, with the herd joined to high-quality Angus sires sourced from Murdeduke Angus, including bulls purchased from the top end of their sales for up to \$32,000. Fertility is a standout feature, with the females consistently calving within a tight 8-week joining period. Angus progeny from this herd are highly sought after and have a proven history of performing strongly in the feature Birregurra weaner sales. These productive, fertile cows are in the prime of their breeding lives and represent a genuine herd dispersal opportunity. Please note the vendor also offers an additional two lots in this complete herd dispersal.
