	Traits
1 Head	Old abcess near side (see photo)
1 Head	White underline to navel

Assessor Comments	HERD DISPERSAL OF THE MACONOCHIE SPRING CALVING HERD. This is an outstanding opportunity to secure top-end, classed in Angus females from a long-term Team Te Mania herd. These pure Team Te Mania Angus blood PTIC T (2022) drop cows are joined to commence calving from the middle of July. The Maconochie family has a strong background in finishing cattle for premium Melbourne butchers, giving them a clear understanding of the role superior genetics play in delivering a quality eating experience for the end user. More recently, steer progeny have been sold to a repeat purchaser for backgrounding and finishing through the Hopkins River Beef program, providing a valuable performance feedback loop. The Maconochie herd has exclusively utilised Team Te Mania Angus genetics since 1998 and officially joined Team Te Mania in 2004. This genuine herd dispersal presents buyers with the opportunity to purchase productive, proven females backed by years of focused genetic selection. These cows have been bred to perform in commercial conditions while meeting the specifications of premium beef markets. Ideal as foundation females or as genuine herd improvers. Please note: One cow has an old well drained abscess on the near side, otherwise it is a fit and healthy animal, but it can be removed at purchasers request (see last photo). A total of 64 PTIC females will be offered in this sale, presented across four lots according to age group.
