very well handled heifers, the heifers are docile to handle and would suit all levels of handling experience.

Assessor Comments	A very nice line of 35 x 2024 Drop Angus PTIC Heifers. Bongongo and Kidman Blood heifers joined to a LBW Bannaby Sire. The heifers are healthy and in forward store condition, they present in very good condition leading into winter and allow buyers to manage them for calving from the 10th of August for 43 days. Purchased in October 2025 from the Monaro region, the heifers have gained weight and started to mature into medium framed females. An ideal opportunity for buyers to calve down and trade or retain in herd for the future. As a group they are presentable heifers with good depth and skin type. Buyers: please note the delivery dates.
