Assessor Comments	A quality line of Angus heifers PTE. Heifers exhibit good frame, have an excellent temperament and present evenly. Heifers carry a clean bill of health and are in fresh forward store condition. Twynam ag have a strong focus on genetic improvement and feed efficiency testing in their operation. These heifers would be a valuable asset to a backgrounding operation with plenty of compensatory weight gain to be had. Heifers are currently averaging .5kg/day growth on short native pastures. Twynam ag have strongly adapted to the Halter virtual fencing technology, and these heifers have had collars on them from the 15th of January. A program which has been deemed a strong success within their business. Please call for further information. Vendor has numerous lots on offer.
