| Assessor Comments      | 28 Angus cows, vendor bred, & Pregnancy tested in calf for an August & September calving. Averaging 661kg at assessment. The Haydon family have been using Weeran genetics for 30 years, and selecting bulls with a focus on growth and calving ease. While retained breeders are selected on Temperament, frame & shape. Having rasied calves every year these cows represent many years of genetic gain and fertility. A great oportuntly to secure proven breeders to start a herd or top up breeding numbers. |                                           |                                     |
