Assessor Comments	45 ANGUS PTIC BREEDERS that have been tested in calf as of 22nd May 2026. Medium to large frame Angus Females have been consistently control joined and culled on fertility. Calves were weaned off the breeders on the same day as the assessment - weaners averaged 265kg. It is a testament to the females to be returned in calf after harsh seasonal conditions. Approx. 5 cows with a blue eye and 1 blue popped eye but not detrimental, please view photo. Cows are presenting in strong store condition. Cows would be an ideal trade article or low cost investment to increase numbers with the right management. Angus Cows have been joined to Carntyne, Glenn Oaks and Oakdale Santa Gertrudis bulls.
