Handled With	These Young Heifers had great temperaments and flowed through the process with ease in. Bikes		
Notable Traits	Traits 2 Head Birth mark on body 3 Head Old pink eye scarring in one eye		
Assessor Comments	An outstanding line of very well bred EU Angus Heifers. The Baringa bloodline descends from Glenavon angus, Outside genetics are imported through an annual AI program and careful purchases from like minded studs. Baringa's breeding objective is to produce easy care, moderate, docile, fertile cattle that excel in structure, calving ease, growth, carcass and maternal traits. Baringa's Progeny are tested annually in the NSW Beef Spectacular feedlot trial and other carcass competitions. These cattle have picked up numerous carcass and MSA awards. These young PTIC heifers are a good reflection of Baringa genetics and should be expected to produce excellent results. They are only being sold due to the continuing dry weather conditions. Heifers were joined over a tight 6 week period & due to calve from late July onwards to Quality Baringa Angus bulls. Excellent soft easy doing females that will preform, Don't Miss !!
