Comment on Fat Score 1 Cattle

The couple of score 1 cows are in okay condition. No issues with travel are anticipated if normal industry procedures are followed.

Vendor Bred	No Vendor has owned stock for More than 12 months			
Stock History	Stock consists of Santa, Santa x SH and SH cows that were purchased in calf to Moogenilla and Trio Angus Bulls on Auctions+ in Aug 2022 and PTIC Angus X cows purchased Nov 2022. The younger cows would be by Bowen Angus bulls out of the purchased cows			
Lifetime Traceable Bloodlines	31 cows are LT, 80 cows are not LT. All cows are on vendors PIC Bowen, Furracabad			
% of Bowen bulls used in sire group	50%			
No. of years on Bowen bloodline	4 years			
% of Furracabad bulls used in sire group	50%			
No. of years on Furracabad bloodline	4 years			
Breeding Comments	Angus bulls over Santa/Shorthorn, Shorthorn and Angus x Cows. The Bowen Angus Bull is presumed to have served the majority of the cows. The Furracabad bull was injured early on in the joining period and was outcast from the herd.			
Grazing Conditions	Grazing native and sub-tropical improved pastures in a cell operation. The season has deteriorated recently. Returned same			
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment			
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

	They were good to handle in the race and through the crush. Eight head were slightly agitated in and exiting the crush, and four cows were moderately agitated. Most of these settled quickly back in the mob. these same cows moved quickly from one yard to the other while taking videos. Nothing aggressive in the mob.			
Handled With	Bikes			
Notable Traits	Traits 5 Head Moderate dog bite signs 1 Head One claw slightly long and curling up 5 Head Slight blue/cloudy eye 1 Head Turned eye			
Assessor Comments	A good to very good quality line of PTIC cows. They range from Angus cross through to some red composites consisting of Shorthorn Santa crosses. Some of the black Angus x cows have a noticeable amount of shorthorn or Santa traits in them. They are mostly medium to large frame cows with only 6 smaller frames. All cows mouthed (first 10 though the crush were mouthed) were a sound full mouth or better, and all are Red Tail Tagged 6 to 8 months in calf (aside from one 5-month PTIC) to Angus bulls, so would suit to calve down in 1-4 months and rejoin or wean and cull. Five cows were noted with slight blue eye scarring in one eye, one with a turned eye, one with a long claw on one foot, and another five cows with historic dog bite signs. Nice functional cows that will calve down around August and continue to produce.
