Assessor Comments	As part of the complete herd dispersal these are a neat line of 6.5 -to 8.5 y/o cows that have shown themselves to be productive, good mothers. The Rennylea Bulls have given the herd solid frame and structure and with consistent classing the temperament has produced a line of easy care productive cows. The had calves weaned in February and continue to freshen up of good feed. They would be a great mob to improve a herd or start with. The effort and expense that has been put into the herd is there for the taking and they will not disappoint. There are 4 across the 36 that have slight blue eyes with examples in the photos. A large percentage was mouthed of the 8.5 y/o were mouthed with the majority sound and a small number showing signs of wear.
