Assessor Comments	As part of the complete herd dispersal these are a neat line of 3rd & 4th calvers that have shown themselves to be good mothers and easy to handle. The Rennylea Bulls have given the herd solid frame and structure and with consistent classing the temperament has produced a line of easy care productive cows. The had calves weaned in February and continue to freshen up of good feed. They would be a great mob to improve a herd or start with. The effort and expense that has been put into the herd is there for the taking and they will not disappoint. There are 6 across the 47 that have slight blue eyes with examples in the photos.
