	On offer is 1 of 2 exceptionally well presented lines of quality of 4+ months PTIC Angus & Angus x Heifers. There are 160 total head that have been split over 2 x 80 head lots split evenly at delivery. At assessment the 160 cattle weighed an average of 430kg. These heifers would suit a quality Angus & Angus X operation with majority heifers displaying AA attributes. Heifers were all purchased as weaners, with large % from Basset Cattle Co Roma, Mungallala as well as southern cattle sales approx 12 months ago and have grown out well. They are all PTIC to low birth weight NB Genetics Angus Bulls. These bulls are in top 12% for marbling and +4.3 for IMF. Heifers were all tested 4-8.5 months in calf with Fit to load guidelines to be strictly followed. Heifers have done extremely well, and can be considered forward store to fat condition. Bid with confidence on weight with heifers having been drafted and pregnancy tested before weighing. Note 1 day delivery day if sold to separate buyers.
