Assessor Comments	16 Droughtmaster cows & 17 calves. Full weight of 476kg range of 336-640kg with 9 steer calves & 8 heifer calves avg. of 298kg. Notice 2 cows being the heaviest cows are dry & heavy in calf & would be fair to say that 2 heaviest progeny would be well & truly weaned. No vaccines or health treatments applied. Calves marked, branded & tagged. Continually depastured with Droughtmaster bull. Please note 14 more units in this marketing campaign as well. Cows are sound with no hips knocked down and good clean udders and observed no faults in feet, lower body and show good mobility and supplying ample milk with calves still shiny and going ahead. Breeders would potentially be well in calf again.
