	Extremely quiet cows, so quiet they were frustrating to move around the yards to photograph or video. A very short flight zone of only a few meters.		
Handled With	Bikes , Vehicles		
Notable Traits	Traits 1 Head Buffalo fly rub		
Assessor Comments	A deck load of mainly store cows that are generally large frame that are all PTIC 2-5 months. These are suitable to take to some good quality feed to calve out and do a fatten and split job down the track. These are undoubtedly the quietest cows I have ever assessed, they were extremely hard to move around the yards so they will suit buyers of all ages and even people with limited stock handling experience. These have just had big weaners taken off them which they have done an outstanding job on considering the lack of suitable feed available to them. Most cows have small needle lumps on the neck but don't appear to be an issue. Please note there is also an additional line of slightly older cows from the same property that can be used to fill up a 2 deck load. A prompt delivery is preferred.
