| Assessor Comments      | A Line of quality 3 year old Angus Cows preg tested 5-6 months in calf (2nd calf) to a Glenisa Angus Bull. At assessment the cows weighed from 394-612kg to average 472kg with a projected delivery average of 448kg and present in a strong store condition. The Cows had their 1st calf weaned off them 2-3 weeks ago and are just starting to dry up. The extremely dry conditions have forced the vendor to completely destock his cow herd, this being the only reason why these genuine proven breeders are offered for sale. Please note the Vendor has another line of cows in the same sale. |                                     |       |                 |                |                |                                     |      |      |       |      |   |      |
