Assessor Comments	A rare opportunity to secure some quality young PTIC females with their whole lives in front of them backed up some of the industries leading Hereford genetics with over 50 years of breeding. These ex stud females have all the hard work done and are ready to calve down in August/ September being joined to curve bending bulls with low birth and high growth. They have a great temperament and were easy to handle throughout the yards. These young heifers should grow out to be medium to large frame functional females, with natural thickness and doing ability. This is an opportunity not to be missed. Vendor has another offering of PTIC cows in the same sale.
