Assessor Comments	47 4 year old cows with calves 3/5 months old (calves marked). Re depastured to Angus bulls on the 5th Feb until delivery. Cows are in store condition and averaged 520 kg. Calves averaged 162 kg. Cows running with 3 bulls and certainly no action while assessing so could all be rejoined ? Cows are mainly large framed with a small % of medium framed cows , cows in store condition & calves are fresh to just starting to dry out. 1 cow has a blue eye and 2 calves had a spray applied in 1 eye at assessment but will probably want further treatment. Cows and calves will respond instantly to better feed and undoubtedly be a great investment come spring. Only selling due to seasonal conditions. Realistic reserve , please ring with any questions.
